What social issue, other than your CSI, will have the greatest impact on your generation and why: Although I'm not sure I would consider it a social issue, I think technological advancements will have the greatest social impact on my generation. Technology is changing everything – the way we communicate, our lifestyles, access to information – it's all right at your fingertips! That can be a double-edged sword. I believe we run the risk of losing both interpersonal and language skills due to the ease and speed of communicating electronically. I believe our educators should address this issue immediately, or it may, unfortunately, have the greatest impact on my generation and every generation to follow.
